Patient Information

Last Name:	**SAMPLE**	First Name:	**SAMPLE**	Middle:	
Date of Birth:	**1964-10-03 (51 yo)**	Gender:	**FEMALE**	Race:	**CAUCASIAN**
Primary Ins.:	**UNKNOWN**	Secondary Ins.:	**UNKNOWN**		

Ultrasound Guided Biopsy

Procedure Date:	2015-11-24
Side:	Left
Facility:	Howard County Test Hospital - SurgCenter
Indication:	Palpable mass with calcifications
Consent:	Written - Including description, alternatives, risks
Pre-procedure Imaging:	Ultrasound, MRI
BIRADS:	3 - Probably Benign
Lesion Location:	2:00
Lesion Distance:	3 cm from the nipple
Needle Approach:	Lateral
Skin Prep:	Alcohol
Anesthesia Type:	Lidocaine without epinephrine
Anesthesia Amount:	0 - 5 cc
Ultrasound Unit:	Toshiba
Transducer:	7-10 MHz, Linear array
Biopsy Device:	Vacuum-assisted rotational-cutting device
Gauge/Size:	9
Number of Cores:	3
Targeting Accuracy:	Excellent
Biopsy Marker:	Suros TriMark
Marker Position:	At biopsy site
Incision Closure:	Steristrips
Planned Follow-up:	Office appointment given
Immed. Complications:	None
