THE AMERICAN SOCIETY OF BREAST SURGEONS

ANNUAL MEETING

April 27 - May 1, 2011 ★ Washington, DC

Welcome to our nation's capital...

Dr. Mahmoud El-Tamer

Dear colleagues:

Welcome to our nation's capital and the 12th Annual Meeting of The American Society of Breast Surgeons. Over the next few days I hope you will find that we have assembled a stimulating program that addresses not only the many recent potentially practice-changing developments in our field, but also what may lie ahead for breast surgery over the next 5 to 10 years. In the general session we'll hear presentations on intraoperative radiation therapy, triple-negative breast cancer, and the management of high-risk lesions. We'll get reports on the research presented at ASCO, the 2010 Breast Cancer Symposium, and the San Antonio Breast Cancer Symposium, as well as a review of the best papers published in 2010.

I am delighted that so many of you are joining us for our pre-meeting program on Wednesday and Thursday. I am sure that you will find that making the time to take advantage of this additional educational opportunity is well worth the effort.

I also look forward to seeing many of you Thursday afternoon for our popular annual Coding and Reimbursement symposium, which will be followed by the satellite symposium on neoadjuvant therapy in endocrine-responsive breast cancer. Don't miss Thursday night's opening reception, where you can spend time with your colleagues in a social atmosphere, while getting a first look at this year's commercial exhibits.

If you haven't already planned to get an early start on Friday at 1 of the 13 Society-sponsored breakfast workshops, I suggest that you check with our registration desk to see if tickets are still available. Society members should be especially interested in hearing Dr. Eric Whitacre's presidential address and should definitely not miss the Society's annual business meeting later that day. Friday's program will also highlight the latest research being done by our colleagues, which will be presented orally in Part I of the Scientific Session later that afternoon and displayed and discussed at the Poster Session and Reception that evening.

On Saturday our focus on research continues with Dr. C. Kent Osborne's keynote address, "Blocking HER2 for Breast Cancer Treatment: A Successful Research Paradigm for Development of Targeted Therapies," the lunchtime Scientific Poster Forum, and Part II of the Scientific Session oral presentations. You'll hear a panel of experts discuss their approaches to treatment at Saturday's Community Tumor Board. Saturday's program also includes an entire session dedicated to breast cancer staging in the molecular era, as well as a mini-consensus that will evaluate the management of the axilla in light of the ACOSOG Z0011 trial.

After a full day of educational sessions on Saturday, you'll be ready for a fun-filled evening at the President's Gala! Come and celebrate with Society President Dr. Eric Whitacre "DC-style," enjoying an evening of food, music and the hilarious political satire of The Capitol Steps. Limited tickets are available so if you haven't purchased your tickets yet to this unique event, stop by our registration desk today and do so.

This year's meeting will end as strong as it begins with a lineup for Sunday that includes the Ask the Experts session, Clinical Trial Update, and presentation on Benign Breast Disease—none of which you will want to miss.

I hope you enjoy your experience at the only meeting dedicated to providing surgeons with the most up-to-date and relevant educational information that will enhance your success as a breast care expert.

On behalf of Dr. Whitacre, our Board of Directors, and the 2011 Annual Meeting Committee, I thank you for joining us and I look forward to hearing from you on your experience at our 12th Annual Meeting.

Sincerely,

Mahmoud El-Tamer, MD

CME Information

Meeting Objectives

Upon completion of this activity, participants should be able to

- Identify current treatment and management options for breast patients
- Assess available studies of breast patients

Target Audience

Surgeons with a special interest in the treatment of breast disease.

Accreditation

This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education through the joint sponsorship of the American College of Surgeons and The American Society of Breast Surgeons. The American College of Surgeons is accredited by the ACCME to provide continuing medical education for physicians.

AMA PRA Category 1 Credits™

The American College of Surgeons designates this live activity for a maximum of 22.75 *AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

American College of Surgeons CME Credit Service

The American College of Surgeons, as the accredited provider of this educational activity, is providing a service to its members. If you indicate on your registration form that you are a member of the College, the CME credit earned from this meeting will be transferred to your ACS MY CME Portal Page. However, it is required that you check off the box on the evaluation form in order for the College to add this credit to your ACS record. Please note that credits earned will appear on your MY CME page within 6 months of the meeting.

The following activities will be offered for CME credit at the Society's 12th Annual Meeting:

Wednesday, April 27

7:30 am – 5:00 pm

- Advanced Imaging and Technology in Breast Care Management (9 CME Credits)
- Stereotactic Breast Biopsy: An Introductory Course (7.5 CME Credits)

Thursday, April 28

7:30 am – 4:00 pm

- Basic Breast Ultrasound: An Introductory Course (7 CME Credits)
- Oncoplastics 2.0: Team Up in Oncoplastic Surgery (7.25 CME Credits)
- Prep Course for Breast Ultrasound and Stereotactic Certification and Accreditation (7.5 CME Credits)

Half-day courses:

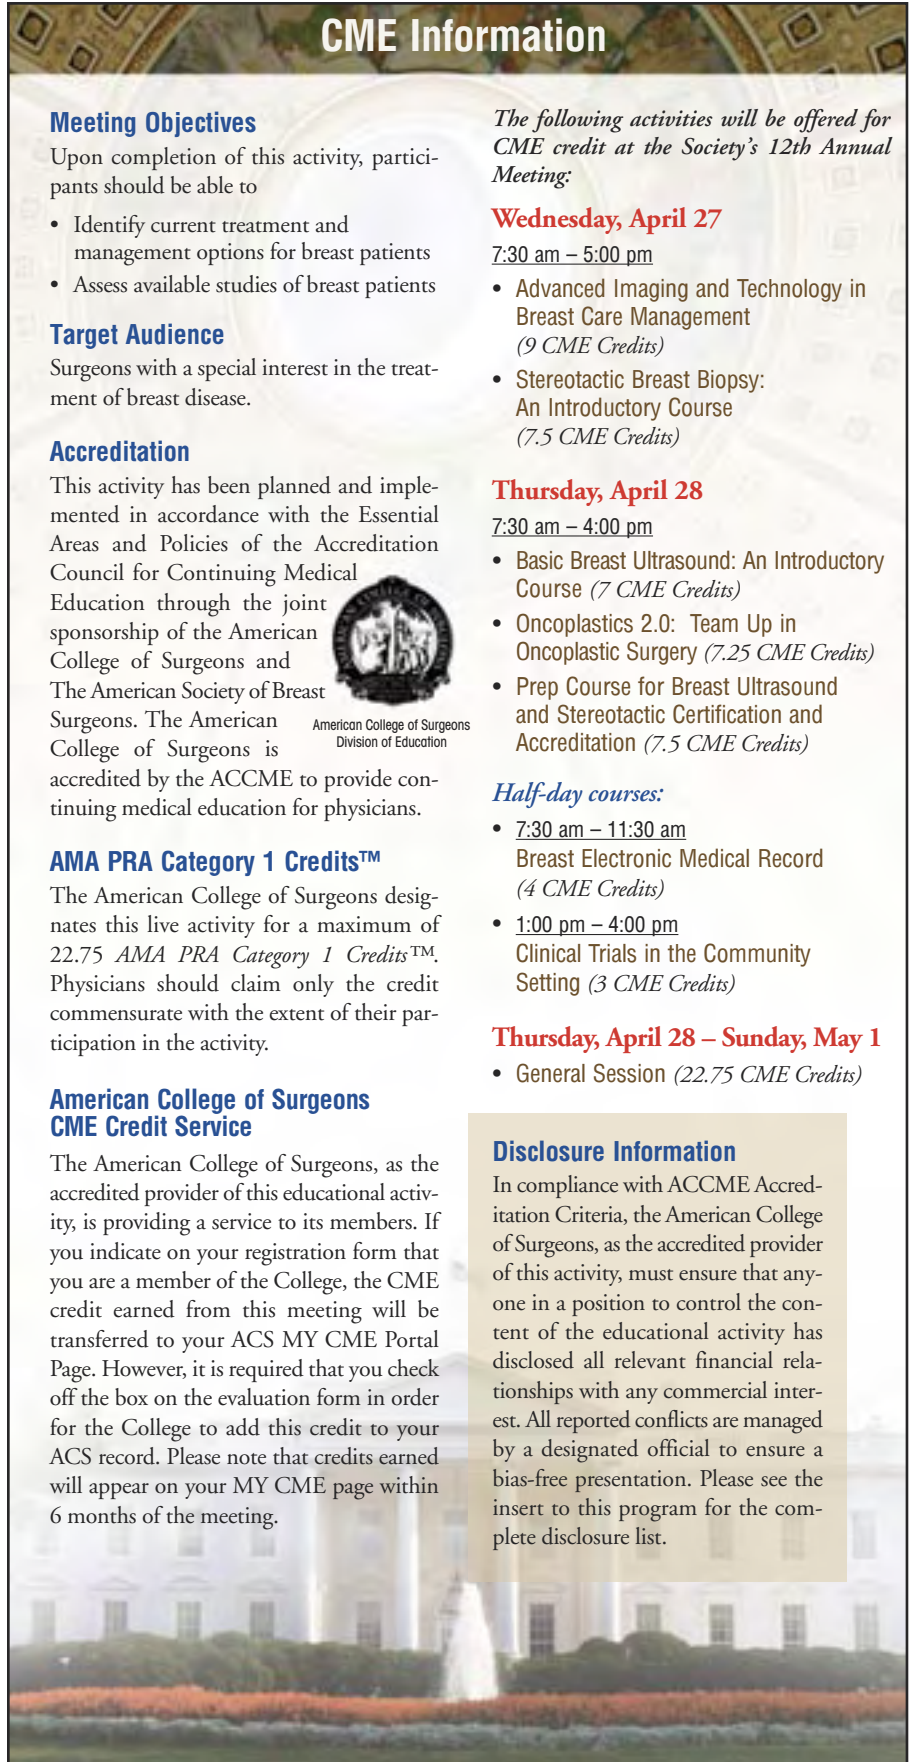

- 7:30 am – 11:30 am
Breast Electronic Medical Record (4 CME Credits)
- 1:00 pm – 4:00 pm
Clinical Trials in the Community Setting (3 CME Credits)

Thursday, April 28 – Sunday, May 1

- General Session (22.75 CME Credits)

Disclosure Information

In compliance with ACCME Accreditation Criteria, the American College of Surgeons, as the accredited provider of this activity, must ensure that anyone in a position to control the content of the educational activity has disclosed all relevant financial relationships with any commercial interest. All reported conflicts are managed by a designated official to ensure a bias-free presentation. Please see the insert to this program for the complete disclosure list.

Satellite Symposium

The Shifting Role of Neoadjuvant Therapy
in Endocrine-Responsive Breast Cancer

Marriott Ballroom, Lobby Level

This symposium will focus on the current and emerging role of neoadjuvant therapy for endocrine-responsive early breast cancer, including the use of genomic signatures for optimal treatment selection. The activity consists of didactic lectures and a debate and allows audience participation through question and answer sessions.

Upon completion of this educational activity, participants should be able to:

- Analyze the role of neoadjuvant therapy in endocrine-responsive breast cancer
- Review current neoadjuvant treatment strategies used in endocrine-responsive breast cancer

- Assess the role of gene expression profiles in selecting optimal neoadjuvant therapy for patients with endocrine-responsive breast cancer

This educational activity is supported by Genentech BioOncology and Genomic Health, Inc. There is no fee to attend this activity or to obtain continuing medical education credit. (This Satellite Symposium is not part of the official ASBS program and no credit has been assigned to it by ACS.)

Friday, April 29, 6:30 am – 7:30 am

Pre-registration and a nonrefundable fee of \$40.00 was required for the following workshops and most are now closed. Check with the registration desk to see which workshops still have space available. Room locations for these programs are listed below and on page 9. Please present your pre-purchased ticket at the door.

B1 Is Breast Surgery a Money-Losing Enterprise?

*Susan Boolbol, MD, Anees Chagpar, MD
Delaware Suite A, Lobby Level*

In these hard economic times, breast surgeons are facing significant financial challenges. In this session, Drs. Boolbol and Chagpar will discuss the fiscal realities of breast surgery, and innovative potential options for breast surgery to remain financially viable.

B2 New Breast Imaging Modalities

*Maxine Jochelson, MD, Lorraine Tafra, MD
Washington Room 1, Exhibition Level*

What, if any, new technologies can be added to mammography, breast ultrasound, and breast MRI to improve our ability to diagnose, locally stage, and follow patients with breast cancer? Drs. Jochelson and Tafra will discuss new modalities, such as digital tomosynthesis, contrast enhanced mammography, PEM, BSGI, breast CT, and new MRI sequences, such as spectroscopy and diffusion weighted imaging, and what they can and cannot be used for.

B3 Hereditary Breast Cancer

*Kevin Hughes, MD, Steven Narod, MD
Washington Room 3, Exhibition Level*

Women at high risk of hereditary breast cancer will benefit from more aggressive screening, chemoprevention strategies, and prophylactic surgery, potentially decreasing the morbidity and mortality of this disease. Drs. Narod and Hughes will discuss the identification of these women in your practice, the value of genetic testing, and the efficacy of various treatment and prevention strategies.

B4 Ipsilateral Breast Cancer Recurrence: Predictors, Diagnosis, and Management

*Judy Boughey, MD, Henry Kuerer, MD, PhD
Virginia Suite B, Lobby Level*

The incidence of ipsilateral breast cancer recurrence has decreased due to better imaging and improving systemic therapies. Drs. Kuerer and Boughey will review the diagnosis and predictors of breast cancer recurrence and end with a discussion on the management of this entity with a focus on new clinical trials and evidence that mastectomy may not always be indicated.

B5 Complementary and Alternative Therapy in Breast Cancer

*Beth DuPree, MD, Debu Tripathy, MD
Washington Room 4, Exhibition Level*

Complementary and alternative medicine (CAM) is of great interest and used commonly by patients with breast cancer. Modalities ranging from exercise and meditation to homeopathy, herbal medicine, and acupuncture have varying levels of evidence to support or discourage their use. Drs. DuPree and Tripathy will review the data behind commonly used forms of CAM and provide a framework for future research that could integrate some of these approaches into the standard of care to improve patient outcomes.

B6 Breast Screening: Who Gets What—Mammography, Ultrasound, MRI

*Wendie Berg, MD, PhD
Maryland Suite A, Lobby Level*

Addition of MRI or ultrasound to mammography will increase cancer detection in certain subgroups of women and will also increase false positives. Dr. Berg will discuss evolving guidelines and evidence for supplemental screening of women at increased risk for breast cancer.

B7 Defining and Measuring Quality of Care in Breast Surgery

*Cary Kaufman, MD, Jeffrey Landercasper, MD
Washington Room 5, Exhibition Level*

Multiple national quality initiatives addressing the quality of care provided to patients with breast disease have been developed. Information will be provided about the value of these programs, including The American Society of Breast Surgeons' Mastery of Breast Surgery program. Methods to audit and improve quality of care locally, regionally, and nationally will be presented as well.

**B8 Adjuvant Therapy for the Surgeon: Who Gets What?**

Clifford Hudis, MD

Maryland Suite B, Lobby Level

Adjuvant therapy has been evolving—first with the development of hormone therapies, then cytotoxic chemotherapy drugs, and more recently targeted agents. Dr. Hudis will discuss the different indications for adjuvant therapy with particular focus on new emerging therapies and technologies to identify important patient subsets.

B9 Health Care Reform and Its Impact on Breast Surgery

Arthur Lerner, MD, Shawna Willey, MD

Virginia Suite C, Lobby Level

Will you survive health care reform? In this practical guide to coping with the new regulatory environment, Drs. Lerner and Willey will discuss the impact of the Affordable Care legislation on the practicing surgeon, as well as explore how surgeons will or will not fit into the planned Accountable Care Organizations (ACO). The security requirements for handling personal health information (PHI) as required under the HITECH act will also be highlighted. The financial impact to your practice will be discussed as well.

B10 Breast Cancer Prevention: Lifestyle Changes, Chemoprevention, and Surgical Options

Katherine Crew, MD, Mary Gemignani, MD

Maryland Suite C, Lobby Level

There is an increased interest in proper breast cancer risk assessments and options for primary prevention. Depending upon the level of risk, these options include risk-reducing surgeries, chemoprevention, and lifestyle modification. Drs. Crew and Gemignani will discuss current breast cancer prevention strategies.

B11 Breast Pathology for the Practicing Breast Surgeon

Savitri Krishnamurthy, MD, Aysegul Sahin, MD,

Ann Thor, MD

Washington Room 6, Exhibition Level

The optimal management of breast cancer is rapidly evolving. Drs. Sahin, Thor, and Krishnamurthy will discuss how a multidisciplinary team of surgical, medical and radiation oncologist, pathologist and radiologist are routinely involved in designing optimal management of breast cancer for individual patients.

B12 Techniques of Breast Surgery: How I Do It

Hiram Cody, MD

Delaware Suite B, Lobby Level

This session will consist of a free-ranging discussion of Dr. Hiram Cody's surgical techniques (for benign lesions, duct excision, breast conservation, and mastectomy [conventional, skin- and nipple-sparing]) and of his perspectives (positive and negative) on the oncoplastic surgery boom.

B13 Mastery of Breast Surgery 101

Eric Whitacre, MD

Virginia Suite A, Lobby Level

Join Dr. Eric Whitacre to learn more about the Mastery of Breast Surgery Program's 4 modules: risk assessment, percutaneous procedures, surgery, and cancer staging. Dr. Whitacre will review the varying levels of participation in each module, how to personalize the program to fit your needs, how to generate reports, and options for participating in Maintenance of Certification Part 4 and the Physician Quality Reporting System (PQRS).

SATURDAY SESSION HIGHLIGHTS

Keynote Address

11:45 am – 12:30 pm

Blocking HER2 for Breast Cancer Treatment: A Successful Research Paradigm for Development of Targeted Therapies

C. Kent Osborne, MD

The American Society of Breast Surgeons Foundation is honored to welcome C. Kent Osborne, MD, as the annual meeting's keynote speaker. Dr. Osborne is a Professor of Medicine and Molecular and Cellular Biology, the Director of the Lester and Sue Smith Breast Center, as well as the Director of the Dan L. Duncan Cancer Center, all at the Baylor

College of Medicine in Houston, Texas. Dr. Osborne is a physician, as well as a research investigator, and has focused on breast cancer his entire career. His research interests include understanding the biology of breast cancer and then developing new treatment approaches for the disease.

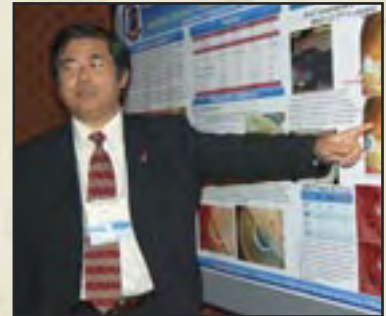

Scientific Poster Forum

12:30 pm – 1:30 pm

Thurgood Marshall Ballroom, South/West, Mezzanine Level

The top 5 scientific posters will be presented and discussed. Free to all registrants.

The FOUNDATION's 5th Annual Silent Auction
 10:00 am – 3:45 pm

The American Society of Breast Surgeons Foundation will host its 5th Annual Silent Auction on Saturday, April 30. Bidding opens at 10:00 am and will continue until 3:45 pm. Winners will be posted during general session on Saturday afternoon and at the Foundation table. Don't miss this opportunity to bid on a variety of items, including exciting vacation destinations, electronics, artwork, collectibles, gift baskets, and more.

The American Society of Breast Surgeons Foundation is a charitable organization dedicated to improving the standard of care for breast disease patients by providing support for medical and

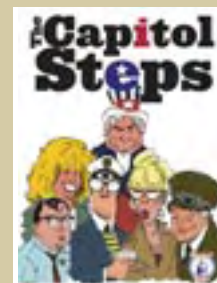

patient education; advancing breast disease research, diagnosis, and treatment technologies; and offering programs and services to medical professionals and their patients.

President's Gala
 8:00 pm – 11:00 pm
(Tickets required)

Marriott Ballroom, Lobby Level

Plan to join Society President Eric Whitacre, MD, and celebrate DC-style at the Society's 12th Annual President's Gala. After dinner you will be treated to the hilarious politic satire of **The Capitol Steps**. For more than 25 years, the Capitol Steps have been digging into the headlines of the day to create song parodies and skits that convey a special brand of satirical humor on both sides of the political spectrum, putting the "mock" in democracy!

Scientific Session Awards

The winners of the 2011 Scientific Session Awards, including the George Peters Award and the outstanding Scientific Presentation Award, will be announced during the President's Gala.
