11TH
ANNUAL MEETING
 APRIL 28 - MAY 2, 2010
LAS VEGAS
 THE AMERICAN SOCIETY OF BREAST SURGEONS

Welcome to Las Vegas!

Dear Attendees,

On behalf of Society President Dr. Victor Zannis, the Board of Directors, and the 2010 Annual Meeting Committee, I would like to welcome you to The American Society of Breast Surgeons 11th Annual Meeting in Las Vegas. This is an exciting time in breast cancer history. Techniques in surgery and radiation are evolving, and major advances are being made in personalized cancer therapy. We have assembled a stimulating program that covers many of those recent advances, as well as the controversies in breast disease management.

Dr. Funda Meric-Bernstam

This year we are offering 6 pre-meeting courses that have been designed to help fill practical and professional gaps in your practice—Advanced Breast Imaging and Technology in Breast Care Management, Basic Stereotactic Breast Biopsy, Basic Breast Ultrasound, Prep Course for Breast Ultrasound and Stereotactic Certification and Accreditation, Oncoplastic Surgery: Breast Conservation and Mastectomy, and the return of Practice Management.

The general session has been comprehensively planned with 22.5 CME hours of talks from experts from around the world. It kicks off on Thursday afternoon with the ever-popular Coding and Reimbursement symposium followed by Research To Practice's satellite symposium, Rounds with Investigators—Clinical Research Leaders Consult on Challenging Cases of Early Breast Cancer. Other presentation highlights include Dr. Zannis' Presidential Address; the Keynote Address by Thomas R. Russell, MD, FACS, former Executive Director of the American College of Surgeons; and sessions on Regional Management of Breast Cancer, Optimizing Breast Cancer Care in the Changing, Economic Climate, Life After Breast Cancer, Update on Adjuvant Therapy, Update on Benign Breast Disease, Clinical Trial Update,

and Breast-Conserving Surgery. Also, be sure to attend the scientific session on Friday and Saturday afternoon, as well as the poster presentations on Friday evening, to learn about the latest research.

Don't miss the always-popular Best Papers Review by Helen Pass, MD; Updates from ASCO, 2009 Breast Cancer Symposium, and SABCs; the session on controversies in breast surgery, featuring debates on the role of lymphoscintigraphy and internal mammary node biopsy, contralateral prophylactic mastectomy, partial breast radiation, and axillary lymph node dissection for positive sentinel nodes; and the community tumor board. Also be sure to attend the new Ask the Experts session, where you will be able to ask questions and share cases, and the scientific sessions, including oral presentations, poster presentations, and a poster discussion of original research.

Please be sure to thank our industry partners for their tremendous support of our meeting by visiting the exhibit hall, starting on Thursday evening with the Opening Reception. You also have a choice of several corporate-supported breakfast and evening symposia on Thursday, Friday and Saturday.

Don't let your trip to Las Vegas be all work and no play! We've built some relaxation into the program as well. Join us at Club ASBS for the President's Gala on Saturday evening. This is the event of the meeting and your chance to party like rock stars with your friends and colleagues.

Thank you for joining us this year in Las Vegas for the Society's 11th Annual Meeting. We appreciate you choosing to attend the only meeting dedicated to the latest issues affecting surgeons who treat breast disease.

Sincerely,

Funda Meric-Bernstam, MD, FACS

GENERAL SESSION

THURSDAY, APRIL 29

Coding and Reimbursement Symposium

4:15 pm – 5:15 pm

Grand Ballroom

Moderator: Mark Gittleman, MD

Faculty: Richard Fine, MD, Eric Whitacre, MD

Due to its tremendous popularity with attendees, the Society is again offering this symposium to address the coding and reimbursement issues faced by surgeons today.

SATELLITE SYMPOSIUM

Rounds With the Investigators – Clinical Research Leaders Consult on Challenging Cases of Early Breast Cancer

5:30 pm – 7:30 pm

Grand Ballroom

For the fourth consecutive year, the Society has elected to partner with Dr. Neil Love and his education group, Research To Practice (RTP), to host the Thursday evening industry-supported satellite symposium at the 11th Annual Meeting. Once again Dr. Love and his group have proposed an innovative and exciting concept that we believe will help create a truly beneficial and worthwhile event. After several years of focusing on the presentation of clinical data, Dr. Love and his team will take a different approach and concentrate on the practical application of research findings in breast cancer management and patient care.

To that end, the meeting will not include didactic presentations, but instead will rely on the expert perspectives of clinical investigators commenting on actual patient cases presented

live by Society members. To obtain the cases that will be included in the event, RTP recently enlisted the assistance of Society members to provide real, challenging cases from their own practices for presentation. At the meeting, select Society members, either in person or via Skype™ video broadcast feed, will formally present their cases to the faculty for treatment consultation and recommendations. We believe the end result will be an interesting, practical, and relevant educational opportunity focused on the management of early breast cancer.

This symposium is sponsored by Research To Practice and supported by Genentech, Inc. and Genomic Health, Inc. This event is free to all registered attendees. (This symposium is not part of the ASBS official program and there is no ASBS CME credit provided.)

Breakfast Workshops

6:30 am – 7:30 am

Pre-registration and a nonrefundable fee of \$40.00 was required for the following workshops and most are now closed. Check with the registration desk to see which workshops still have space available. Room locations for these programs are listed below and on page 9. Please present your pre-purchased ticket at the door.

B1 Benign Breast Disease: Case Discussions

Gretchen Ahrendt, MD
Susan Boolbol, MD

Raphael 1

Appropriate management of common benign breast diseases can be challenging. Drs. Boolbol and Ahrendt will review management guidelines and share their experiences in a case-based discussion.

B2 Skin-Sparing and Nipple-Areolar-Sparing Mastectomy: Indications and Technique

Gildy Babiera, MD
Rache Simmons, MD

Raphael 3

Interest in skin-sparing, areola-sparing, and nipple-areola-sparing mastectomies has increased. Drs. Babiera and Simmons will review the existing literature, and discuss indications and technical details for each surgical approach.

B3 Breast Cancer Risk Assessment and Prevention

Isabelle Bedrosian, MD
Victoria Seewaldt, MD

Raphael 2

There is an increased interest in accurate breast cancer risk stratification, and breast cancer prevention. Drs. Bedrosian and Seewaldt will discuss current risk assessment, surveillance, and prevention strategies.

B4 Molecular Oncology Primer for the Practicing Surgeon

Tari King, MD
Elizabeth Mittendorf, MD

Da Vinci 1

New molecular technologies are being incorporated into breast cancer care every day. It is increasingly essential that practicing surgeons be familiar with molecular oncology. Drs. Mittendorf and King will review the principles for molecular oncology that are relevant to a breast surgery practice.

B5 Partial Breast Irradiation

Peter Beitsch, MD
Dennis Holmes, MD

Da Vinci 2

Are you interested in learning how to incorporate partial breast irradiation in your practice? Drs. Beitsch and Holmes will review the data supporting postoperative partial breast irradiation and intraoperative radiation therapy, and will discuss technical approaches to each.

B6 MRI: Appropriate Use and Interpretation

Arthur Lerner, MD
Susan Orel Roth, MD

Da Vinci 3

Many controversies remain surrounding the use of MRI in breast cancer screening and management. Drs. Lerner and Orel Roth will provide a balanced perspective about its appropriate use and interpretation.

B7 Advances in DCIS

Brian Czerniecki, MD, PhD
Henry Kuerer, MD, PhD

Da Vinci 4

There is significant basic and clinical ongoing research on DCIS. Drs. Czerniecki and Kuerer will review current management guidelines, as well as state-of-the-art research in the field.

B8 Preventing and Reacting to Lawsuits

Dennis Kennedy, Esq.

Donatello 2 & 3

Medicolegal concerns often dictate what is done in clinical practice. Mr. Kennedy will review approaches to avoid lawsuits, as well as to handle medicolegal problems when they do arise.
